Projects

4bagger
http://4bagger.leadconcept.info
Description :Project is about to develop a site for sports man .4bagger is multi user dashboard system where coach can create team and add player from given list. director can create tournament events where teams join event after pay tournament fee. director have full right to create its own team for join event . 4bagger have also subscription base paid articles in home page. Director refund the payment to team coach . admin have full right to update and delete the user,player,coach and director accounts and their profiles. In 4bagger for payment integration , payment refund and subscription offer use Authorize.net payment gateway.

FSG-Forney Shopping Guide

https://fsg.leadconcept.business/
Project is about to develop a site for users to sell thier products .FSG is a multi user dashboard system where user can post ad's and sell their products on FSG platform. User have two options either he/she wants to post Free and Premium Listing. User can post only one Complimentary Listing for free. If User want to post a Listing with some premium options like more images and categories so the buyers can filter out easily then user needs a premium package for each Premium Listing . Admin have all rights to view any users profile,inactive/active the user,delete and block user account if user will post anything inappropriate. In FSG for payment integration , subscription offer Paypal is used.
